By Dorothy H. Crawford, Ingolfur Johannessen, Alan B. Rickinson : Cancer Virus: The discovery of the Epstein-Barr Virus the fourth post in our cancer and infections series is a continuation of the epstein barr virus ebv story from its remarkable discovery 50 years ago weve what are risk factors and causes of epstein barr virus infections

Cancer Virus: The discovery of the Epstein-Barr Virus:

8 of 9 review helpful A fascinating look at EBV and its many manifestations By ealovitt While taking a course in immunology I became interested in viruses and bacteria that hijack our immune systems in essence getting a free ride from the very cells that are tasked with protecting our bodies from foreign pathogens and damaged self cells A well known example of a virus that hides in and eventually destroys our immune s The Epstein Barr virus EBV was discovered in 1964 At the time the very idea of a virus underlying a cancer was revolutionary Cancer is after all not catching Even now the idea of a virus causing cancer surprises many people But Epstein Barr named after its discoverers Sir Anthony Epstein and Dr Yvonne Barr is fascinating for other reasons too Almost everyone carries it yet it is only under certain circumstances that it produces disease It has been associated as a unique and early chapter in what is now a hot field of biological inquiry The Scientist About the Author Dorothy H Crawford has been Assistant Principal for Public Underst
