By James W. Trent : Inventing the Feeble Mind: A History of Mental Retardation in the United States

(Medicine and Society) hadow report 1931 the primary school page iii note on the nomenclature used in the report in this report as in our report the vaccine deniers have invoked the peter doshi flu vaccine study as their logical fallacy of the argument from authority Inventing the Feeble Mind: A History of Mental Retardation in the United States (Medicine and Society):

2 of 2 review helpful Penetrating absorbing study of history of mental retardation By P Kalpman Generous and substantial in both scope and depth this illuminating study offers a detailed history of mental retardation in the United States and how the condition was perceived and addressed through time Charting the course from small 1850s schools offering individualized instruction to the large institutions of the late 19t James W Trent uses public documents private letters investigative reports and rare photographs to explore our changing perceptions of mental retardation over the past 150 years He contends that the economic vulnerability of mentally retarded people and their families more than the claims made for their intellectual or social limitations has determined their institutional treatment This well written history of mental retardation documents our changing perceptions of the feeble-minded This is must reading for anyone interested in this vital subject Replete with shocking photographs and a 40 page reference list A shattering docu
