By Lawrence K. Altman : Who Goes First?: The Story of Self-Experimentation in Medicine scientists are developing ways to edit the dna of tomorrows children should they stop before its too late i first stumbled across the concept of neurofeedback while researching a story on anger in 2014 a couple of the experts i interviewed mentioned the practice and i Who Goes First?: The Story of Self-Experimentation in Medicine:

8 of 9 review helpful A Magnificent Book By K L Sadler This is one of the few nonfictional books that I have ever read that I have literally had a hard time putting it down Dr Altman not only wrote a book of significant importance

about the need for self experimentation and the history of it but he wrote it so well that I wanted to know what and who did the next group of experiments It also explained a lot of proc Lawrence Altman has authored the only complete history of the controversial and understudied practice of self experimentation In telling the stories of pioneering researchers Altman offers a history of many of the most important medical advancements in recent years as well as centuries past mdash from anesthesia to yellow fever to heart disease With a new preface he brings readers up to date and continues his discussion of the ethics and controversy that continu com Medical research When most of us hear those words our imagination conjures up bored graduates with white jackets in a sterile porcelain laboratory knowing no more about their subjects than ID number and blood type This depersonalization of modern s
