0 of 0 review helpful enlightening and entertaining I had no idea finding drugs was so hard and subject to chance By Bill y fascinating treatment of the history and difficulty of finding effective drugs most important point is that hunting drugs is not like building a car where the manufacturer knows that its engineers with enough time and money can build a specific product It is more like disney creating movies The surprising behind the scenes story of how our medicines are discovered told by a veteran drug hunter The search to find medicines is as old as disease which is to say as old as the human race Through serendipity mdash by chewing brewing and snorting mdash some Neolithic souls discovered opium alcohol snakeroot juniper frankincense and other helpful substances Ouml tzi the Iceman the five thousand year old hunter frozen in the Italia A well written and highly informative book Recommended for The ASCO Post readers especially as a travel companion ASCO Post A must read for a behind the scenes look at new drug development rdquo Madelyn Fernstrom PhD
